

Hello, Peter

Thank you for contacting our support team.

I tried the demo locally and everything is working as expected on my computer.

We will be glad to help to resolve your problem. Can you please provide more information about the problem? If you follow few steps to describe the problem, you will help us to do best of us to fix your bugs:

- 1. What is the version of KendoUI and what is your browser's version?**
- 2. What exactly is the error? If possible, describe the exact steps to reproduce the problem.**
- 3. You may take a picture at problem or send us your project if it is possible.**

It will be pleasure to us to assist you.

Best Regards,

Vladimir Georgiev
